Professional Summary

Junior Full Stack Developer with a strong foundation in Python/Flask and JavaScript, holding a degree in Computer Engineering (Ingeniería de Ejecución en Computación e Informática). I come from an IT support and programming teaching background, where I review code and mentor student teams on their project design. I have built complete web applications on my own, from the data model to the admin panel. I am looking for my first role as a Full Stack or Backend developer, remote or hybrid.

Technical Skills

Proficient (used in my projects)

- **Backend:** Python, Flask, Flask Blueprints, Jinja2, authentication, admin panels, web scraping (Requests, BeautifulSoup4), APScheduler
- **Frontend:** JavaScript, HTML5, CSS3, Bootstrap, Chart.js, responsive design
- **Databases:** SQL, SQLite, PostgreSQL, MySQL, entity-relationship modeling
- **Best practices:** OOP, SOLID principles, Clean Code, design patterns, code review, refactoring
- **Tools:** Git, GitHub, VS Code, Linux

Working knowledge

- Java, C#, Node.js, ReactJS, Docker, MongoDB, Oracle, Power BI
- Scrum (SFC certified), agile methodologies, Trello, Jira

Featured Projects

GunplaScrapper-Chile | Price monitoring platform with web scraping

Code: github.com/Jose94D/GunplaScrapper-Chile • Stack: Python, Flask, SQLite, Jinja2, Requests, BeautifulSoup4, APScheduler, Chart.js

- Developed a platform that collects prices from 8 Chilean e-commerce stores through scraping scheduled with APScheduler every 12 hours, storing a price history of more than 400 products in SQLite.
- Designed a modular architecture with Flask Blueprints, a data access layer, and an independent scraper for each store, plus logging of administrative actions.
- Implemented a unified catalog that merges duplicate products across stores, and a user interface with filters, sorting, pagination, historical price charts, and dark mode.

DynamicLanding | Modular CMS for commercial landing pages

Code: github.com/Jose94D/DynamicLanding · Stack: Python, Flask, SQLite, Jinja2, Bootstrap, Chart.js

- Developed a CMS to create and manage commercial landing pages, with a private, authenticated admin panel and a custom-designed data model.
- Implemented a blog with full CRUD, visibility control and module ordering, and SEO settings (meta title, description, and Open Graph) editable from the panel without touching code.
- Built a traffic analytics module with interactive charts by year and month.

Professional Experience

Programming Instructor | CFT San Agustín / CFT Estatal del Maule | March 2024 – Present

- Review and evaluate the code of more than 40 student software projects, focusing on SOLID principles, Clean Code, and design patterns.
- Guide student teams in architecture design, refactoring, and debugging of their projects.
- Design course materials and technical guides for Software Security, Advanced Programming II, and IT Service Management.

IT Technician and Support | Liceo Nuestra Señora del Rosario | March 2023 – February 2024

- Administered servers, networks, and IT infrastructure for 150 users.
- Configured security policies with a PfSense firewall, reducing network incidents by 35%.
- Resolved hardware and software failures, reducing downtime by 20%.

Education

- **Bachelor's Degree in Computer Engineering** (Ingeniería de Ejecución en Computación e Informática) | Universidad Católica del Maule | 2021 – 2023
- **Higher Technical Diploma in Programming and Systems Analysis** (Técnico de Nivel Superior en Programación y Análisis de Sistemas) | CFT San Agustín | 2018 – 2021

Certifications

- Microsoft Power BI | Santander Open Academy | October 2026 | ID: OA-2026-1001003269215
- Scrum Fundamentals Certified (SFC) | SCRUMstudy | August 2024 | ID: 1045081
